Since 1982 Barrier Signs Pty Ltd has been supplying quality signage to the Traffic Control Industry, Commercial and Private sectors. Situated in Taree on the Mid North Coast of NSW, Barrier Signs modern manufacturing facilities cater for a variety of products including traffic control signage, architectural signage, illuminated signage, corporate logo design, safety signage as well as traffic and signage hardware items. We span a variety of products and almost all of this is achieved in-house so as to have control of every aspect of production.

Quality Endorsed Company since 1993, Health & Safety since 2008 & Environmentally accredited in 2011, Barrier Signs guarantees

the highest standard of workmanship on all products manufactured in house, this is also accompanied by Barrier Signs 3M Accreditations, MCS Warranty for Commercial Signage and Diamond Warranty Program for Traffic Signage.

Our precision ZÜND swiss cutting system is capable of die cutting a range of materials including Class 1100, 400, 100, Corflute and a wide range of non reflective products.

# GUIDE SIGNAGE & STREET BLADES

3M™ *Digital Diamond*  
Certified Manufacturer

3M Diamond Warranty  
Programme

**CMYK photo's direct to reflective sheeting with outstanding results!**

DURST is the leader in quality UV printers delivering CMYK photographic images direct to class 1100 Reflective sheeting with outstanding durability. "Ideal for town entry signs and alike".

## Custom Directional Blades & Street Blades

- UV digital printing on 3M reflective sheeting using our Durst traffic machine is one of the best ways to ensure that your street blades will last a long time!
- A 10 year warranty applies to street blades using this printing method on Class 1 with 1170 or 1160A overlaminate.
- All street blades can be custom printed with your logo.

## Material Options

- Standard Aluminium I section blades  
available in 150mm or 200mm

- 6mm Aluminium blades  
available in 150mm or 200mm

- 6mm PVC blades  
available in 150mm or 200mm

- Mill Finished Fluted Posts

Fluted posts are not only decorative but in the event of damage, frangible poles can be easily removed and replaced without interfering with existing foundations when used in conjunction with ground sleeves.

- VR blades

The VR Blade is Barrier Signs answer to your vandalism problems, we can upgrade the standard I section with a strengthening bar.

The bracket and blade can be powdercoated to suit your council image.

VR blades

## Brackets

A range of options are available for street blade brackets as shown below.

Brackets can be powdercoated to any required colour specification.

Custom brackets can also be cut to suit blades greater than 200mm in height.

(Polar Cap) Works with  
6mm Flat Aluminium &  
Aluminium I Section.

The sign selection shown here is a guide to choosing the correct size and letter height for the right application.

All sizes and letter heights shown here comply with TfNSW specifications. Sign sizes are based on the letter height and will change according to the information required. Our design team can apply these specifications to the information you provide to create signs that comply with Australian Standards.

G1 - 1 2215mm x 1230mm  
Cobar LH: 160mm

T7 - 1A Slow Bat 450mm Dia  
T7 - 1B Slow Bat 600mm Dia  
Class 400 or Fluro Reflective on timber or telescopic handle

Including optional black PVC cover

# FLASHING TRAFFIC WAND

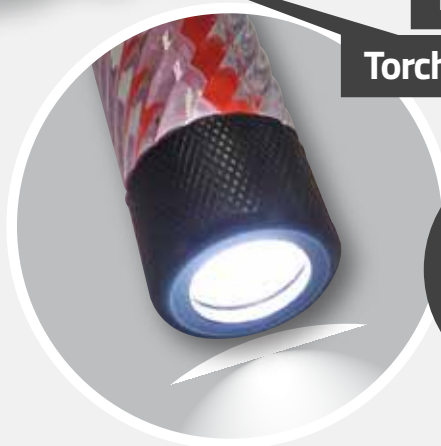

Flashing controller

Torch controller

## FEATURES:

- High quality robust construction
- Flashing red or green & red/green alternating
- Super bright LED torch
- Magnetic base
- Takes 3 AAA batteries
- Belt clip

LED  
Torch

# POST SUPPORT & WEDGE

## FEATURES:

- A Barrier Signs product
- For use with any surface mounted 50 N/B post
- Perfect for pedestrian bollards
- Hot dipped galvanised steel construction
- Includes wedge for securing or use holes for tek screws or bolt installation

Tec Screw Fixing Option

Wedge Fixing Option

# BARRIER104

## VERSATILE SIGN POST SYSTEM

A modern signage solution that remains flexible to accommodate future changes.

Barrier Post 104 is a versatile sign post system that incorporates modern sleek styling with strength and durability.

Height, width, shape and sign face materials are all variable.

A precision square extruded aluminium post with an internal groove system perfect for your chosen face materials and changable to suit your future needs.

The Barrier 104 Post can be installed with a concrete footing or Pad Mounting (for securing to concrete). This flexibility allows for a wide range of installation options when it comes to substrate restrictions.

Posts have an anodised aluminium finish or 2 Pac sprayed in a colour that compliments your sign face.

We are proud to be a supplier for National Parks and Wildlife Service who use our Barrier 104 Post system on park signage throughout NSW.

[www.barriersigns.com.au](http://www.barriersigns.com.au)

# GALVANISED V-LOCK & WEDGE

## FEATURES:

- Easy removal of existing 50 NB post
- Use where high incidence of post knock down occurs
- Hot dipped galvanised
- Mounts flush to concrete surface

# PEDESTRIAN REFUGE BOLLARDS

## FULLY MANUFACTURED IN-HOUSE

Our qualified team of engineers, spray painters and signage experts can produce quality bollards in a range of sizes. Our manufacturing processes meet all required Australian standards, ensuring a quality product with long lasting results.

## STANDARD SIZES

600mm x 1350mm  
800mm x 1350mm  
1200mm x 1350mm

Custom sizes  
available.

# ALUMINIUM BARRIER BOARDS

## FEATURES:

- Heavy Duty 2.5m Aluminium Barrier Board c/w Cl 1 Yellow Reflective Sheeting
- Digitally printed with company logo or custom message
- High strength & durability
- Easily stackable
- No UV breakdown problem common with plastic
- Made to Australian Standards AS1906 - Retro-reflective sheeting

# SOLAR FLASHING LIGHTS

## FEATURES:

- Super Bright LED
- Unit comes complete with battery
- Operation time: fully charged 8 days (12 hours per day)
- Size: 273mm x 179mm x 78mm
- Light sensor, ON-OFF automatically by daylight
- Water resistant
- Beam distance 300m (at dusk)
- Flash mode: blinking 90 times per minute

Built in Solar Panel

The above signs are available in:  
300mm x 300mm, 600mm x 600mm  
900mm x 900mm, 1000mm x 1000mm

Illegal Dumping Signs  
600mm x 600mm, 900mm x 900mm,  
1200mm x 1200mm

2000mm x 1000mm

We can also match existing signage that you may have for a complete branding look.

The Prohibited, Information & Warning symbols in this section are based on standard symbols used in NSW. If the symbol you require is not found here, our graphics department can design any interpretive pictogram you require.

Below are some examples of signs using interpretive symbols. We have an extensive library of interpretive symbols that comply to Australian Standards. Interpretive signs are a great way of communicating information in a visual format.

**John Holland Park**

## Diamond Icons or Triangle Icons?

According to the Australian Standards AS/NZS 2416, Diamond or Triangle icons may be used on regulatory signs. However the icons **MUST** be consistent across all signs displaying warning icons.

Regulatory signs are not to have both icon types on a single sign.

AS 1319-1994 states requirements for design & application of safety signs intended for the workplace, providing criteria for:

- Regulation & control of safety related behaviour
- Hazard warning
- Emergency information, including fire protection details

## Sign Classification & Use

### 1. Danger Signs

Warn of a specific hazard, hazardous conditions or environment that is likely to be life threatening.

### 2. Warning Signs

Notify of a particular hazard, hazardous conditions or environment that is NOT likely to be life threatening.

### 3. Mandatory Signs

Indicate that an instruction **MUST** be carried out.

### 4. Prohibition Signs

Are an alert that an activity is not permitted.

### 5. Emergency Information Signs

Identify the location of, or directions to, emergency related facilities such as safety equipment, exits or first aid facilities.

### 6. Fire Signs

Advise of the location of fire alarms & fire-fighting facilities.

## Recommended sizes for symbols & letter height

Recommended minimum sizes for signs are as follows: Signs in a factory or yard environment, where lighting is good & signs are mounted in reasonably prominent positions.

**Symbolic Sign (Pictogram) size**  
15mm per metre of viewing distance.

**Lettering Size**  
Upper Case - 5mm per metre of viewing distance.  
Lower Case - 4mm per metre of viewing distance.

Signs in poor lighting conditions, not likely to fall readily into the observers line of sight, or are otherwise likely to be placed in less conspicuous positions should have signs increased by 50% or more in size.

Available in two sizes: 225mm x 300mm, 450mm x 600mm (custom sizes available)

### 3M Reflective Self Adhesive Rolls

For brilliant visibility on vehicles.  
Available in 5 colours, 3 metre & 45 metre rolls.

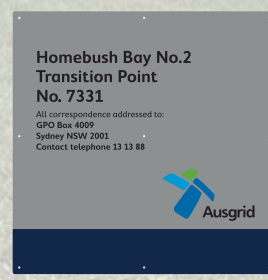

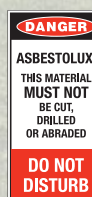

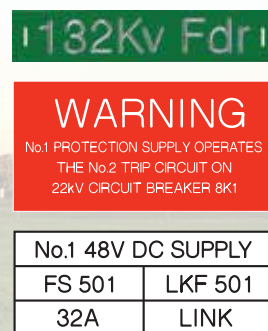

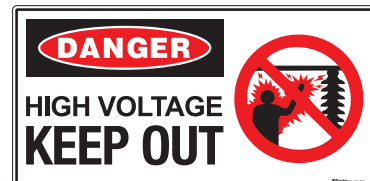

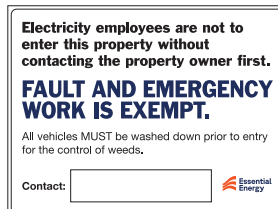

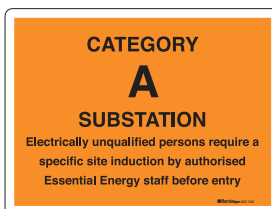

## Specialising in engraved asset management plates

### What we can do!

Barrier Signs has a supply partnership with multiple providers in the Energy sector. One of these providers is Essential Energy with whom we have been working with since 2017, providing both an end-to-end procurement solution providing standard and bespoke signage as well as a supply and installation project for their navigable waterway signage.

Our manufacturing facility is equipped with the latest engraving and routing equipment to produce quality long lasting asset management plates and safety signage. Reflective or non reflective, Aluminium or gravoply we have many options to choose from.

Give us a call on **6552 7200** or email us on **[sales@barriersigns.com.au](mailto:sales@barriersigns.com.au)**.

**Transport of chemicals.** The Globally Harmonised System (GHS) of Classification and Labeling of Chemicals came into effect on the 1st January 2017. It replaces the existing system.

The Australian Code for the Transport of Dangerous Goods by Road and Rail (**the ADG Code**) will continue to apply for chemicals that are being transported or are considered as being in transit. Hazardous chemicals are in transit if they are at the workplace for no more than five consecutive days and have not been used. The **ADG Code** is based on a universal system of labelling and classification for physical hazards and toxicity in the transport sector. The **GHS (Globally Harmonised System)** builds upon and complements these hazard communication systems.

**GHS Pictograms      ADG Code      250mm x 250mm Signs or 250mm x 250mm Self Adhesive stickers (custom sizes available)**

### 3M Diamond Warranty Programme Certified Manufacturers

3M Diamond Warranty Programme Certified Manufacturers are authorised to provide the benefits of the 3M Extended Warranty for Permanent Signage to their customers (users). These Certified Manufacturers undergo a robust audit process each year and are subject to rigorous 3M manufacturing guidelines.

Each year, they are issued with a Certificate of Accreditation, validating their authority to provide the benefits of this Extended Warranty to their customers for that year. A copy of this Certificate should be requested from your manufacturer annually to ensure all signs manufactured within that year are covered.

## Are you getting what you're paying for?

3M Diamond Certified Manufacturers ensure you receive the highest quality-assured road safety signage.

## Did you know?

3M offers through their Certified Manufacturers an extended warranty for permanent signage for up to 12 years.
