WHAT WE MAKE

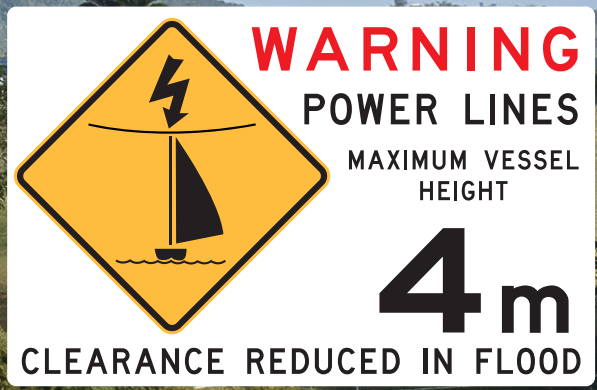

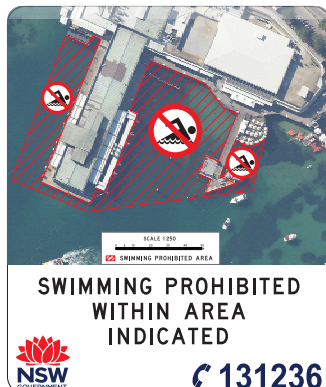

At Barrier Signs we pride ourselves on the quality of our products.

We can produce signage that can offer 12 years warranted (manufacture backed guarantee) support with 32 plus life expectancy for external signage.

Barrier Signs is a trusted industry leader and preferred supplier for TfNSW Road and Maritime signage.

Our products meet the signage production criteria of the QA Specification 3400 for compliance. Of which part of the requirement is to have the materials tested and independently verified at the Allunga Exposure Laboratory based in Townsville. This is not only for fading but also for reflectivity of the signage particular at night.

Below and to the right is just a small sample of some of the water/marine safety signage items we manufacture.

APPROVED CONTRACTOR

HOW WE HELP WITH PROCUREMENT

At Barrier Signs we offer complete end-to-end procurement solutions for all your signage and signage hardware requirements.

We partner with your procurement team to ensure we understand your purchasing process and requirements in the areas of quoting and purchase order process and management of unique asset identifiers. We ensure we match your internal item codes with our system to make ordering and receipt of items from Barrier Signs efficient and seamless. We pay close attention to Maritime technical specifications to ensure our products meet all current Australian and TfNSW Standards. It is these procedures that make re-ordering a streamlined process.

We can offer fixed price agreements that enable budget management for purchasing teams and operational departments.

Barrier Signs adds value as a supply partner that constantly works with our customers to understand their purchasing requirements and can evolve with them as their requirements evolve whilst delivering quality products and services in a timely manner.

ARE YOU GETTING WHAT YOU REQUIRE ?

Simply check your signs are meeting the requirements by the coding (date stamp) on the rear of the sign.

7.8.3 Format of Coding

The identification coding must include the following information:

- a Sign manufacturer's name. Where a sign manufacturer has more than one manufacturing facility location, the location of primary manufacture must also be indicated.
The abbreviated name coding must be as approved by the Principal.
B 3M Sign manufacturer (Barrier Signs) and material manufacturer (3M)
- b Month and year of sign manufacture.
10/23 Month and Year of manufacture
- c Manufacturer of sign face materials, and class of retroreflective sheeting used.
CLASS 1X / CLASS 1100 Retroreflective
- d High Wind designation, if applicable.

NSW MARITIME SIGNAGE CODE (SP1101)

- 1.6 mm marine grade aluminium
- Rib extrusion on rear for pole mounting
- Class 1X / Class 1100 reflective with UV protective overlamine
- C/W slide extrusion for changeable messages
- Anti-theft locking holes for changeable slides
- Fully customised messages available
